WORK EXPERIENCE

DevOps Engineer
Rakuten

02/2025 - Present   *Tokyo, Japan*

- Helped migrate QA API from QA Kubernetes cluster to Production cluster, overcoming cross-environment challenges.
- Automated Kubernetes cronjob deployments from being a very manual chore to one script that deploys against multiple Terraform workspaces.
- Created Ansible playbooks to automate self-hosted Sentry installation and upgrade process.

Senior Site Reliability Engineer
Mulesoft (Salesforce) ⇗

04/2020 - 01/2020   *San Francisco, California*

- Helped onboard legacy applications on to Kubernetes clusters.
- Worked with Terraform, Jenkins, SaltStack, and Groovy to manage and optimize our infrastructure provisioning pipeline.
- Increased team productivity by identifying manual processes and sharing scripts that automated them.
- Created automation around updating Slack groups to reflect current on-call users.
- Acted as a gatekeeper in triaging and approving changes to the production environment of 100,000+ servers.
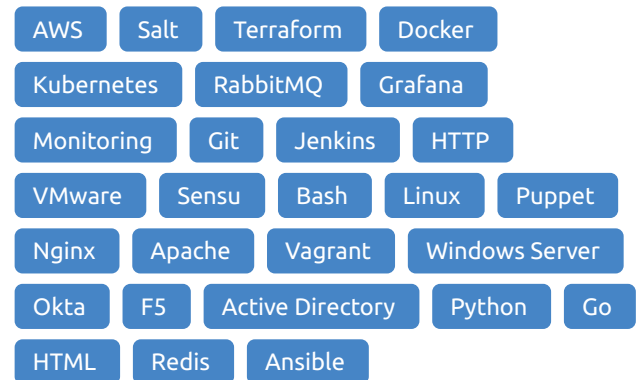

Systems Engineer II
Uber Technologies, Inc. ⇗

08/2016 - 03/2020   *San Francisco, California*

- Served as the lead SRE for Uber's internal chat platform, which employees relied on with 99.9% uptime.
- Owned event monitoring pipeline of 1,600+ Windows and Linux servers, processing 1000+ events / second.
- Reduced on-call incident volume by 50% by implementing checks with auto-remediation.
- Simplified code-base to utilize YAML for so non-developers could make updates.

SKILLS

AWS · Salt · Terraform · Docker · Kubernetes · RabbitMQ · Grafana · Monitoring · Git · Jenkins · HTTP · VMware · Sensu · Bash · Linux · Puppet · Nginx · Apache · Vagrant · Windows Server · Okta · F5 · Active Directory · Python · Go · HTML · Redis · Ansible

EDUCATION

Bachelors of Science - Information Systems
Towson University ⇗

2007 - 2011

WORK EXPERIENCE

Linux Systems Administrator
Clicktime.com, Inc. ⬀

03/2016 - 07/2016   *San Francisco, California*

- Implemented Zabbix for monitoring across server fleet.
- Performed maintenance on production IIS servers with 99.9% uptime and introduced monitoring to environment.
- Implemented Veeam as a VM backup solution.

Systems Administrator
Inflection.com, Inc. ⬀

06/2013 - 03/2016   *Redwood City, California*

- Worked with EC2, S3, RDS, ELB, and other AWS services.
- Administered 400+ VMs in ESXi environments across multiple data centers.
- Used Zabbix, Pingdom, Splunk, NewRelic and PagerDuty for site/application monitoring on-call rotation.
- Promoted from Desktop Support after helping with employee onboarding/offboarding and IT inventory and requests.
